

GASCON ADDITIVE

Description GASCON is a blend of synthetic polymer and micro fine materials which controls fluid loss, minimizes free water, aids thixotropy, helps control gas migration and provides excellent bonding properties as well as aiding in the prevention of compressive strength retrogression at higher temperatures.

Properties Form:	Powder Color: Gray
Odor: None	Specific Density: 2.2
Bulk Density: 38 lb/ft ³	Absolute Volume: 0.06 gal/lb.
Water Solubility: Slightly Soluble	

Application GASCON is used at concentrations of 3.0% to 15.0% BWOC at BHST ranges of 60oF (16°C) to 220oF (104°C). GASCON will provide good fluid loss control and addition of fluid loss additives will not normally be required.

Compatibility GASCON has no known incompatibilities.

Handling/Storage Store in a dry place. Avoid contact with skin and in particular with eyes. Wash all clothing, gloves etc. that have been contaminated before re-use. In case of contact with eyes wash with large amounts of water and wash skin with soap and water. Refer to Material Safety Data Sheet (MSDS) for handling and hazard data.

Packaging GASCON is shipped in 50 lb bags.
